

Manatee Gates

Environmental Composites, Inc. manufactures ENVIRO PIPE AT GUARD ENDS Manatee Gates, specified to FL DOT Design Standards (Index 430-001). These products are available painted or galvanized in the sizes specified by the customer.

Because many manatee deaths are directly attributed to water control structures, these gates will ensure that systems continue to operate all while protecting the natural species that inhabit our environment. ECI can custom fabricate a manatee gate using **aluminum**, **steel** or **stainless steel**, to meet your requirements.

Manatee Gates

Did you know...

- In 2019 the FWC recorded 5,733 Florida Manatees.
- Manatees cannot tolerate temperatures below 68° F (20° C) for long periods of time.
- Manatees have no natural enemies, and it is believed they can live 60 years or more.
- The cow-like creatures are thought to have inspired mermaid legends.
- They eat more than a 10th of their weight in food every day.

You can help protect manatees in many ways.

If there is a wildlife emergency, please use the following information:

- Report injured, orphaned, entangled, distressed or dead manatees to the **FWC**. Call the Wildlife Alert Hotline at 888-404-3922.

Early reporting sets the rescue team in motion so that the animal(s) can be saved.

Other ways to help include individual, family or community activities that enhance manatee habitat, safety or support (FL Fish & wildlife Conservation Commission).
